

Chevron is one of the largest integrated energy companies in the world. Headquartered in San Ramon, California, and conducting business in more than 100 countries, the company is engaged in every aspect of the oil and natural gas industry, including exploration and production; refining, marketing and transportation; chemicals manufacturing and sales; and power generation.

Chevron has the experience, assets and organizational capabilities to connect upstream resources with downstream markets. The company's outstanding track record of developing and managing large, complex energy projects with multiple partners offers a critical advantage in the increasingly competitive global gas marketplace.

Chevron Global Gas brings together the key businesses involved in natural gas activities: production, liquefaction, shipping, regasification, pipelines, marketing and trading, power generation, and gas-to-liquids technology. The goal is to deliver a seamless package of reliable, competitively priced products and services, from wellhead to burner tip.
