

IHI Group, (IHI Corporation (IHI), IHI Marine United Inc. (IHIMU), and European LNG tank subsidiary Felguera-IHI (FI)), is a leading EPC company with over 150 years of experience.

IHI, as a pioneer of LNG technology, has over 40 years of experience in LNG receiving terminal construction projects since the first LNG terminal project was started in Japan. Currently, IHI commands the top domestic share in the EPC of LNG receiving terminals and LNG tanks in Japan, and has gained valuable experience in undertaking LNG tanks and terminal projects in (China), India, Mexico, Qatar, Spain, Taiwan, and the United States.

IHI Group provides clients with many solutions in the LNG business such as LNG storage tanks, LNG receiving Terminals, SPB LNG carriers, BOG compressors, and SPB Tanks for F-LNG facilities.

IHI is especially proud to have worked with the country of Algeria, the site of LNG 16, for nearly 40 years in various projects, and are currently constructing three new LPG trains with a capacity of 3 million tons per year in Arzew for SONATRACH.

IHI Group, with headquarters in Tokyo, Japan, is a global company with over 20 international offices worldwide. IHI Group creates business opportunities by utilizing skills and knowledge of both IHI and our cooperative partners around the world, and will continue to integrate its technologies from various fields to provide the best possible solutions in all aspects of the LNG fields.
